### Employee Of The Year: TBD

Accu-Fab would like to recognize the employees who throughout 2000 have excelled in the performance of their respective duties. The individuals listed above have consistently exhibited the desire and determination to exceed our customer's expectations. On a monthly basis we attempt to recognize associates for their special effort, talent and leadership. As 2000 comes to a close, we wanted to look back and take notice of those individuals. Without their commitment and dedication, Accu-Fab could not function as a company nor ever consider accomplishing our corporate vision of World Class Leadership in our Industry.

## ISO 9002 CERTIFIED

On November 13-17 Intertek Services conducted the final ISO 9002 assessment audit. We successfully passed the audit and were recommended for formal Certification which we received from Intertek Services, Inc. on Dec. XX.

This was certainly a significant milestone in the life of our company. Our ISO documentation effort began over 5 years ago in 1995. At that time conforming to MIL-std-45208 we began a journey to conform to our customers expectations later recognizing the benefits the ISO system contributed to our overall organization. The documentation process survived significant business growth, a move to new plant facilities, introduction of considerable information/manufacturing technologies and 3 Internal ISO coordinators. But we made it and are all proud of it!!!

In the closing meeting of the week long assessment audit (shown above) the Intertek Lead Auditor was very complimentary of the maturity of our ISO systems and the employee involvement at Accu-Fab. We recognize all our employees, each of whom contributed to this achievement. Most specifically we recognize Kit Mattox, ISO/Training Coordinator, George Toney, Quality Manager and Jim Nance, Plant Manager for their vision and expertise in leading us through the certification process.

Being true to our commitment of "Continuous Improvement" we intend on expanding our achievement by driving the documentation systems throughout the various operational levels of our company.

### Goodbye and Good Luck !

Colin MacWilliam is known and respected by everyone here at Accu-Fab our customers and suppliers. Colin's wife has been accepted into engineering school at the University of Colorado. While we all wish he could stay...she wants him to go!!! We're all going to miss Colin and Candice and wish them both the best of luck. Colin has been a very valuable member of our team. His friendship, talents and enthusiasm will not easily be replaced.
