ACCU-FAB ANNOUNCES ACQUISITION OF CAN-DO TOOLING

While celebrating its 29th year in business, Accu-Fab, Inc (AFI) also celebrated the acquisition of Can-Do Tooling, Inc (CDT). CDT has been in operation since 1992 supplying machined components and assemblies, specialized manufacturing tooling, and customized machinery to a wide customer base.

CDT's experienced engineering staff provide direct customer design support for special projects along with performing manufacturing engineering functions and programming of CNC machining equipment.

customers. Conversely, AFI could provide infrastructure resources to CDT that would be of considerable benefit to CDT's customers.

Through the acquisition of CDT, AFI continues to diversify in-house manufacturing capabilities. Further capability expansion is planned to add additional hard tool design/construction resources and high volume production stamping processes.

President Gregg Page and Vice-president Dennis Zullig along with the Accu-Fab staff maintain that this acquisition was a great way to celebrate our 29th anniversary!

Manufacturing processes include CNC turning and milling, surface grinding, welding, electro-mechanical assembly and heavy gauge sheet / structural steel fabrication. Unique processes include sizeable grinding capabilities, engineering of specialized machinery and tooling, as well as, quick turn-around of prototypes and maintenance parts.

Can-Do Tooling's sales records from recent years reveals both continuity with, and diversity to Accu-Fab's existing account base. After a lengthy evaluation, AFI determined the addition of the management/engineering talent and process diversity of CDT would be a considerable enhancement to the existing services currently offered to AFI

ACCU-FAB WELCOMES CAN-DO EMPLOYEES

Can-Do Tooling, Inc.

History and Facts:

- Founded in 1992 by Barry Blinson
- Relocated into new manufacturing facility in 1993
- Due to continued growth, relocated in 1999 into former Accu-Fab facility in Knightdale, NC
- Serves over 50 area companies, operating 2 shifts

Barry Blinson

The acquisition of Can-Do Tooling, Inc. allows Accu-Fab the great privilege of welcoming new company members to our staff. Three leaders of the Can-Do team are Barry Blinson, Don Howell, and Terry Mousseau.

Barry Blinson, founder and President of Can-Do Tooling, started the company in 1992 with 15 years prior experience in the areas of model making and mold shop managing. Barry will continue his involvement contractually with AFI through mid 2004, primarily focused in the areas of sales/new product development and engineering support. Barry and his wife Gale have been married 24 years and have a 16 year old daughter.

Terry Mousseau of Wendell will serve as Manager of Machining Operations. With almost 30 years of production machining and management experience, Terry is

going to be a great asset to our management staff. While managing CNC machining operations at Can-Do for the last 4 years, Terry has also utilized his pneumatic and electronic background to design manufacturing equipment for automating assembly processes. Terry has been married 30 years, has two grown children, and enjoys running, tennis, water-skiing, fishing and computers.

Don Howell, has been involved in manufacturing & tool engineering for over 23 years. His past experiences include work with such companies as Channel Master Corp., Freightliner Truck Div of Mercedes Benz Company, and Acme United Corp. As a Customer Engineering Liaison, Don will coordinate customer projects and provide engineering expertise in design of tooling, special projects and machinery. Don has a BSME degree and is a Journeyman Tool & Die Maker. He has 3 grown children and lives in Zebulon, NC

MACHINE TOOL EXPANSION (PARTIAL LISTING)

- Haas Vertical Machining Center (X Travel=64", Y Travel=32", Z Travel=32")
- Supermax Rebel 4—Vertical Machining (X Travel=43", Y Travel=24", Z Travel=22")
- Takumi VII Vertical Machining Center (X Travel=43", Y Travel=22", Z Travel=26")
- Supermax TC-2 CNC Turning Center (18.9" swing x 21.7" between centers)
- 3-Southwestern 3-Axis Prototrack CNC Milling (X Travel=43", Y Travel=24", Z Travel=22")
- 4-Clausing CNC Kondia Milling Machines (X Travel=34", Y Travel=14")
- Clausing Lathe (14" X 40")
- TOS Lathe (20" X 40") / TOS Lathe (20" X 80")
- Boyer Shultz Surface Grinder (6" X 18")
- Chevalier Surface Grinder (6" X 18")
- Thompson Surface Grinder (X Travel=72", Y Travel=36", Z Travel=36")
- Miller Tig Welder (500 Amp) / Miller Mig Welder (250 Amp)
- Dake Tiger 350AX Automatic Cold Saw
- Edwards Jaws IV 55 Ton Ironworker
- Rollin Vertical Band Saw
