His expertise include Cadcam Programming, Machining Process Engineering, Design Engineering and Plant Management. He is married with 3 sons ages 15, 17, and 22. Eric lives in Smithfield and his interests include coaching youth soccer and building computers.

## MORE THAN JUST A FAB SHOP

### To Better Serve You

To better serve the marketplace, in August of 2001, Accu-Fab broadened its metalworking capabilities by acquiring the assets and precision machining expertise of Can-Do Tooling. This enabled Accu-Fab to add CNC Turning and CNC Milling to its precision sheet metal fabrication product offering. The addition of this business positions Accu-Fab as a true turnkey contract manufacturer. Operations include design, laser cutting, fabrication, machining, welding, powder coat painting, screen printing, electro-mechanical assembly, and kitting.

### We Can Meet Your Needs

The Accu-Fab Machining Division is focused on customers with CNC machining needs. We provide complete product development and engineering support from prototypes through full production. Your product and machining requirements are supported with comprehensive CAD/CAM programming technology. Some of the industries served include electronics, telecommunications, robotics, medical/pharmaceuticals, and preci-

sion weighing and measuring as well the critically demanding requirements of the nuclear energy industry. We work with and are familiar with the latest machining methods for all major material types including, carbon steel, aluminum, stainless steel, and many plastics.

### High Quality Products

As an ISO 9001-2000 certified supplier of machining services, Accu-Fab rises above much of the competition in the marketplace. Operating procedures and process are in place to assure that customers receive consistent high quality products.

### Pricing, Workmanship, and Service

If you purchase machining services, or have a need for parts that are both fabricated and machined, you should give Accu-Fab the opportunity to show you how we can support your requirements. Send us a quote and you will be pleased with our pricing. Send us an order and you will be pleased with our workmanship and our service.
